Subject: Subject: Research News Release (Region 10): EPA plans scientific assessment of Bristol Bay watershed

Marianne,
My firm provides near-shore environmental assessments of areas that may be impacted by development or industry in Alaska. Our focus is on the sub sea environment and how that area is responding to the impact and the general benthic health. This portion of the watershed study is critical to the marine species

that are directly impacted and the subject of this study.

We use both remote (SPI, Coring, Video, Photo and sediment and water chemistry) and diving techniques to acquire data. Our scientists are recognized world wide in there vocations and specialties. We have performed critical work on many Category 5 303D list impaired water bodies. We can provide this study with the direct impacts of shore based development projects on the sensitive benthic habitat.

Are you aware of any RFP that will result from this EPA study? Please let us know if we can be of assistance in any way.

Best Regards,
Steve Haggitt
